3. Conclusion	5
A. Appendix A- Map of the HER Records.....	6
B. Appendix B- HER Records	7

1.0 INTRODUCTION

- 1.1 This Heritage Statement is written to accompany the planning application seeking planning permission for the demolition of all existing buildings and structures and the replacement with 95 units of holiday accommodation, together with two swimming pools and a clubhouse at Atherfield Holiday Camp.
- 1.2 This Statement details the heritage assets of the site, including those that are within the immediate vicinity.
- 1.3 This Statement is written using the available information from a desk based study, including the Heritage Environment Record (HER) as held by the Isle of Wight Council and does not include any invasive site investigation.

2.0 HERITAGE STATEMENT

- 2.1 A search of the Isle of Wight Council's Heritage Environment Record (HER) was undertaken for this site as well as the surrounding area, and although the HER contained a great deal of information regarding a number of artefacts found off site (including flint arrowheads, pottery, human and dinosaur remains) the site itself does not appear to highlight the potential for any significant findings. A copy of the HER plan is included within Appendix A, with the full HER itself listed under Appendix B.
- 2.2 Further to the HER, a search of all Listed Buildings and / or Structures within a 500m radius of the centre of the site was made, as shown below in Figure 1.

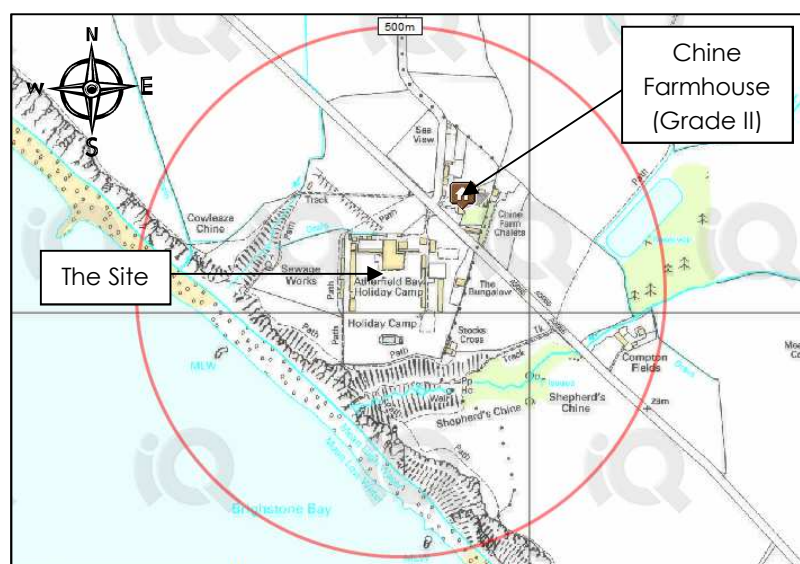

Figure 1 - this diagram highlights the site, together with the only Listed Building within a 500m radius of the site.

- 2.3 Figure 1 shows just one Grade II Listed Building, Chine Farmhouse (granted Listed status on the 28th March 1994) which is detailed as:

“Farmhouse. C17 altered in C19. Front is rendered with incised lines. Central panelled cemented chimneystack. 2 storeys and attics in gable ends. 2 triple C19 casements, the 2 ground floor windows linked by a label mould. Stone gable end with kneelers. Deep plinth. C19 gabled slate porch. Interior has spine beams with 2 inch chamfer with lambs tongue stops. Blocked in large fireplace.”

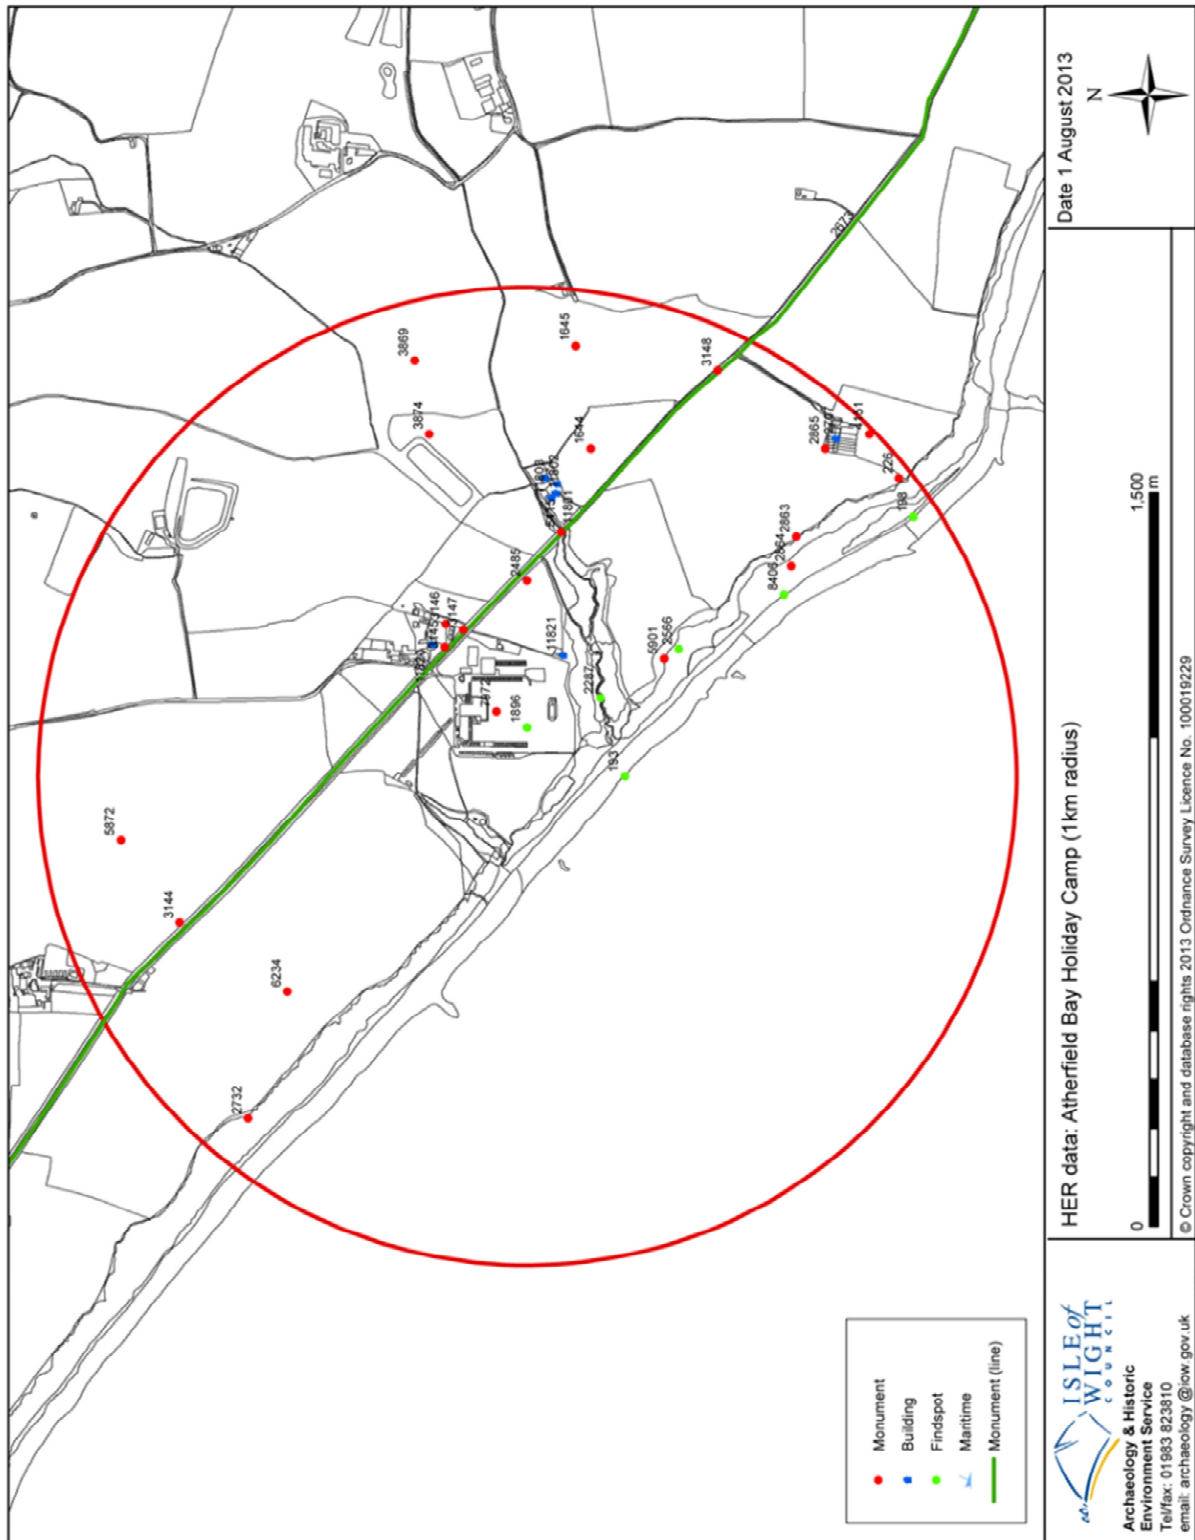

Figure 2 - Chine Farmhouse © Images of England, John Barlow, 2013

- 2.4 Because Chine Farmhouse is located to the North of the Military Road (A3055) and set within a farm complex, it is not considered that the redevelopment of the site will cause any negative effect to either the Listed Building or its setting. It should also be considered that there is an adjacent holiday camp site next to the proposed site, which is currently operated by Chine Farm itself.
- 2.5 The wider area is known for several high profile dinosaur finds, although any new discoveries on this site are unlikely to occur due to the nature and scale of the redevelopment works. As the park units are being placed on concrete platforms, rather than having dug foundations, there is a minimal amount of excavation works proposed on site. Taking this into consideration, any artefacts within this site are likely to remain in situ and undisturbed by the redevelopment as proposed.
- 2.6 As with any responsible developer, should any finds be made during the redevelopment works, the appropriate authority will be informed and invited to examine the potential artefacts.

3.0 CONCLUSION

- 3.1 The redevelopment of this site will not cause any long term impact to the existing Listed Building, which is located on the opposite side of the Military Road (A3055) to that of the site. In the short term, the demolition and redevelopment will lead to larger vehicles on site and noise, however, these are comparable to large farm vehicles that are used in and around the immediate area, which is farmland. Following the redevelopment, the site will be used as it was previously for many decades, as a family holiday park with little to no impact to the neighbouring buildings.
- 3.2 In the event that any archaeological finds are made, they will be reported to the Isle of Wight Council and recorded.
- 3.3 If you require any further information regarding this application, I trust that you will contact the agent.

There was a beacon at Atherfelde in 1324 with a watch of four men by night and two by day.

Monument Types and Dates

BEACON (Medieval - 1066 AD to 1539 AD)
Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

There was a beacon at Atherfelde in 1324 with a watch of four men by night and two by day [White, H.T. 1930. 'The beacon system in Hampshire', Proc. Hants. F.C. 10, 253-5]

The most likely place for the beacon would have been in the vicinity of the coast guard look out at SZ 45217924, but nothing remains of the former site. [Ordnance Survey Field Investigator 1971.]

No indication of site of beacon noted.

Large stone of Lower Greensand with two trimmed edges meeting at an angle of 80 degrees found in the stream bed		

Monument Types and Dates

FINDSPOT (Unknown date)
Evidence UNSTRATIFIED FIND

Description and Sources

Description

Finder visited the County Archaeological Centre on 11 October 1994 with a large stone slab he had found in the bed of the stream at Shepherds Chine. The stone was of Lower Greensand and had two trimmed edges meeting at an angle of 80 degrees. The corner was trimmed off. On the face there was a flat sunken area about 1cm deep with edges at 80 degrees, mirroring the shape of the slab. The stone was photographed in the back of finder's car by D.L. Motkin. [.]

Nothing observed during general survey.

2673 - MIW2658 Military road	Freshwater Bay/Chale. Military Road	Monument

Monument Types and Dates

MILITARY ROAD (Early C19 to C20 - 1801 AD to 2000 AD)
Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

The Military Road is clearly represented as a chalk lens in the eroding cliff face at the following positions:

SZ 37572 84381
SZ 37496 84482
SZ 37258 84862
SZ 37199 84916
SZ 37136 84950
SZ 37072 85014

A short stretch of the road from SZ 37496 84482 to about SZ 37453 84546 has banks on either side. Further to the west, however, the banks diminish gradually and the road develops into a berm. Just further west of SZ 37072 85014 the roadway has been cut through the ferruginous sand ridge. From here it proceeds westwards, then northwards to join the alignment of the modern road at approx. SZ 3700 8501. [Field visit, F. Basford, R. Loader, 13.8.1998 (coastal audit)]

Proceeding westwards the old Military Road appears to be on the same alignment as the modern road, where a number of military fence posts are visible at the sides of the road (more so on the north side)

At SZ 35153 85612 the modern road veers north westwards to Freshwater Bay. Previously the Military Road veered to the north west near this location and followed the coast into Freshwater Bay. However, this section of the Military Road no longer exists due to coastal erosion.

Between SZ 35153 85612 and SZ 34906 85631 the Military Road is in the form of a sunken way and progressively gets deeper as it proceeds westwards.

An earthen road block c.6.0m wide, c/0.6m high exists at SZ 35036 85609.

Another earthen road block c.6.0m wide, c.1.3m high exists at SZ 34911 85629 (now damaged). [F. Basford, field visit 3.9.1998]

Military road visible as a vegetation/parch mark from SZ 37572 84381 as far east as Shippards Chine at which point it joins the alignment of the modern road.. [Aerial photograph. 1971 BKS Survey. 152945.]

NTSMR 126167

This section of the Military Road [at Freshwater Cliffs] constructed in the 1860s. The road was re-routed further inland in 1933 due to coastal erosion. To the north of Freshwater Cliffs the road is sunken with banks measuring <2m high.

The base consists of a gravel and chalk bottom partially grassed over and measuring approximately 5m wide. [Wessex Archaeology, 2007, Afton, Brook and Compton Down NT Survey 2006]

Coastguard station located inland and to west of station shown on 1866 OS

Monument Types and Dates

COASTGUARD STATION (Late C19 - 1867 AD to 1900 AD)
Evidence EXTANT BUILDING

Description and Sources

Description

Coastguard station inland and to west of station shown on 1866 OS
[Ordnance Survey 1909 6" sheet 97 SE]

Coastguard lookout marked at SZ 4521 7924
[Ordnance Survey 1962 6" sheet 47 NE]

The coastguard lookout is no longer present. The remains of a brick building with flat concrete roof (air raid shelter) may be seen on the beach.[F. Basford, R. Loader, site visit, 27.8.1998 (coastal audit)]

Photograph of coastguard lookout [Powell, G.H. n.d. Island Bygones, vol. 1', unpubl. (IWSMR)]

Coastguard lookout visible on aerial photograph [Meridian Airmaps Ltd. S.W.A. Isle of Wight, 11.7.83 18/83 077 (on loan from the Environment Agency)]

Brick building - an air raid shelter - which had fallen onto the beach was photographed and position measured using GPS to SZ 45170 79173. [Field visit F. Basford, R. Loader, 19.11.1999]

Coastguard Station shown on 1898 OS digital map including LSA house depicted on 1898 25" and 1909 (digital) OS Map.

Lookout depicted on 1898 and 1909 (digital) OS map at SZ 4522 9088. The Cottages, out buildings and LSA building are still extant. [R. Edmunds 23/11/2010]

Enquiries suggest the second set of houses were built in 1890. This was a terrace of six houses for the Coastguards, with a slightly larger houses at the west end of the terrace and a much larger house at the east end. Presumably, the Station had two more senior officers when built. The terrace had storerooms and washhouses at the northern side with a separate larger store etc for the largest house. The area around the Station was contained within a concrete block wall about a meter high. A concrete path was laid from the Station towards the edge of the cliff above Atherfield Point where a Lookout was established with a flagstaff for signalling...In addition to the Life Saving Apparatus store at Blackgang another brick structure was constructed within the compound of the Atherfield Station so that rockets and cliff rescue equipment would be available close to the scene of so many wrecks. The new Atherfield Station is shown on the 1907 OS Map for the area; enquiries suggest it was probably built in about 1890, with the LSA building some years later, probably in 1902 when there were eight Coastguards at the Station. This was one of the last Stations to be closed on the Island; the final entry found being 1925 when August Henry Wilkins was the Officer in Charge.
[Gale, T 2005, 'Coastguards of the Isle of Wight' p65-66]

Lens of burnt flint & stone in cliff face

Monument Types and Dates

HEARTH (Prehistoric - 500000 BC to 42 AD)
Evidence SUB SURFACE DEPOSIT

Description and Sources

Description

Burnt flint noted in cliff face.
[Field visit, F. Basford, 9.7.1998]

Burnt flint/stone lens c.2.5m long, c. 0.25m maximum thickness, 0.4m below the present ground surface. At position SZ 43905 80572 measured using GPS
[Field visit, F. Basford, R. Loader, 25.8.1998 (coastal audit)]

Feature still visible in cliff face.
[Field visit, F. Basford, 27.12.1999.]

Human bone found during metal detecting rally		

Monument Types and Dates

HUMAN REMAINS (Unknown date)
Evidence UNSTRATIFIED FIND

Description and Sources

Description

During a metal detecting rally on 26th October 2005, by the Isle of Wight Metal Detecting Club, what was believed to be a human bone was found.

Frank Basford (Finds Liaison Officer of the Portable Antiquities Scheme) informed the police and a site visit was made by F. Basford, the finders (IWMDC) and John Stirling (Newport CID). The find spot was measured to SZ44476 80825 using GPS and the bone was taken for examination by the police.

[Pers. Comm. F. Basford, 31 October 2005]

Bone deemed to be more than 100 years old and returned to Frank Basford, 15th November 2005.

Examination of bone showed it to be a robust lower arm bone [.]
